NFPA 3000® COMPONENTS OF RECOVERY PHASES FOR AN ACTIVE SHOOTER/HOSTILE EVENT RESPONSE (ASHER) PROGRAM

IMMEDIATE

- Operational security
- Damage assessment
- Coordination of primary agencies
- Utilization of a committee meeting protocol
- Accountability
- Primary victim notification and reunification
- Victim assistance
- Medical examiner or coroner operations
- Initial investigation and evidence collection operations

EARLY

- Media and public information coordination
- Resource needs analysis
- Analysis of consequences of the event
- Subsequent events
- Federal emergency funding opportunities and grants
- Victim advocacy, assistance, and services
- Memorial preservation

CONTINUED

- Business impact analysis
- Restoration of the supply chain
- Maintenance of pre-incident controls
- Adequate controls to prevent the corruption or unlawful access to the entity's data during recovery
- Coordination of the restoration, rebuilding, and replacement of facilities, infrastructure, materials, equipment, tools, vendors, and suppliers
- Reopening or relocation of vital facilities such as schools, grocery stores, and day cares that allow a community to return to their day-to-day schedule
- Continuation of communications with stakeholders
- Roles and responsibilities of the individuals implementing the recovery strategies
- Internal and external (vendors and contractors) personnel who can support the implementation of recovery strategies and contractual needs
- Identification of gaps that could require supplemental state or federal assistance
- Investigation of fraud associated with disaster assistance and assurances of consumer protection
- Long-term victim services
- Long-term community resiliency

- Volunteer and donation management

ITS A BIG WORLD.
LET'S PROTECT IT TOGETHER."
